Suggestion on Project Topics

Project based learning

Project-based learning (PBL) in digital electronics combines hands-on learning with theoretical knowledge, providing a comprehensive understanding of digital systems and components.

Project-Based Learning Structure:

1. Selection of Topic

•Objective: Choose a relevant digital electronics project that incorporates both combinational and sequential logic circuits.

•Guidance: Topics should be selected based on their applicability, innovation, and the depth of knowledge they offer in digital electronics.

2. Design and Optimization of Digital Circuit

•Tools: Utilize design software to draft and optimize circuit layouts.

•Verilog HDL: Focus on coding the logic in Verilog, ensuring that the design is efficient and scalable.

3. Simulation and Hardware Implementation

•Discrete Components: Integrate additional discrete components as necessary to complete the project setup.

•FPGA: Implement the design on FPGA boards, translating the Verilog HDL code into a physical, functioning circuit.

This structured approach not only enhances the learning experience but also prepares students for professional challenges in the field of digital electronics.

Continuous Assessment (25 Marks)

1. Preparation and Pre-Lab Work (7 Marks)

- Pre-Lab Assignments: Assessment of pre-lab assignments or quizzes that test understanding of the upcoming experiment.
- Understanding of Theory: Evaluation based on students' preparation and understanding of the theoretical background related to the experiments.

2. Conduct of Experiments (7 Marks)

- Procedure and Execution: Adherence to correct procedures, accurate execution of experiments, and following safety protocols.
- Skill Proficiency: Proficiency in handling equipment, accuracy in observations, and troubleshooting skills during the experiments.
- Teamwork: Collaboration and participation in group experiments.

3. Lab Reports and Record Keeping (6 Marks)

- Quality of Reports: Clarity, completeness and accuracy of lab reports. Proper documentation of experiments, data analysis and conclusions.
- Timely Submission: Adhering to deadlines for submitting lab reports/rough record and maintaining a well-organized fair record.

4. **Viva Voce (5 Marks)**

    - Oral Examination: Ability to explain the experiment, results and underlying principles during a viva voce session.

Final Marks Averaging: The final marks for preparation, conduct of experiments, viva, and record are the average of all the specified experiments in the syllabus.

Evaluation Pattern for End Semester Examination (50 Marks)

1. **Procedure/Preliminary Work/Design/Algorithm (10 Marks)**

    - Procedure Understanding and Description: Clarity in explaining the procedure and understanding each step involved.
